# Israa Munawwar

Backend Developer | Laravel & REST APIs

Damascus, Syria | +963 954 652 404 | esraamnower@gmail.com
linkedin.com/in/israa-munawwar | github.com/israamunawwar

## SUMMARY

Backend developer specializing in Laravel, RESTful APIs and relational databases, with hands-on Flutter experience for mobile clients. Second-largest contributor to a 6-role university management platform, where I built the real-time chat module, hardened API security (IDOR, XSS, rate limiting) and delivered the student module end to end. Seeking a junior backend developer or internship role.

## TECHNICAL SKILLS

**Backend:** PHP, Laravel (Sanctum, Queues, Pusher), RESTful API Design, C#, ASP.NET Core, Python

**Databases:** MySQL, SQL Server, Oracle, SQLite, ERD Design, Indexing, Query Optimization

**Security:** Token Authentication, IDOR & XSS Remediation, Rate Limiting, Session Management

**Mobile:** Flutter, Dart, Provider, Dio

**Tools:** Git, GitHub, GitHub Actions, Postman, Linux, Figma

**Foundations:** Systems Analysis & Design, Networking Fundamentals (CCNA coursework)

## PROJECTS

**Edu Bridge – University Management Platform (Graduation Project)** | Laravel 12, Sanctum, Pusher, MySQL, Flutter | Backend · Mobile App

- Web dashboard and Flutter app serving 6 user roles; built in a team of 4 as the second-largest contributor to both backend and mobile.
- Built one-to-one and group real-time chat for all roles on web and mobile using Pusher.
- Secured the API by fixing IDOR and XSS vulnerabilities and adding rate limiting, background queues, database indexing and a single-active-session policy.
- Delivered the student module end to end: Laravel APIs and Flutter screens for dashboard, attendance, schedule, assignments and notifications.
- Refactored a monolithic admin controller into 9 focused controllers with FormRequest validation; added ArcFace face verification, a Telegram bot and PDF/Excel reports.

**DrPasswords API** | Laravel, Sanctum | GitHub

- REST API for a physical password manager (Flutter app + ESP32 device) with token authentication and encrypted credential storage synced between app and hardware.

**Warehouse Management System** | Laravel, MySQL | GitHub

- Warehouse and lab-equipment system for an educational institute with roles and permissions, borrow requests, maintenance tracking and Excel/PDF reports.

**Palestinian Folklore E-Commerce Platform** | Laravel, MySQL | GitHub

- Authentication, order processing and a dynamic shopping cart, with an admin dashboard for real-time inventory monitoring.

**Warehouse Automation System (Desktop)** | Python, Tkinter, SQL Server | GitHub

- Desktop inventory application with location tracking, transaction reports and automatic low-stock alerts.

## EDUCATION

**Technical Diploma in Computer Information Systems**
Damascus Training Centre (UNRWA), Damascus, Syria | 2024 – 2026

## COURSES

Frontend Web Development – CodeCraft (Online) | Intermediate English – UNRWA, Damascus

## LANGUAGES

Arabic – Native | English – Professional Working Proficiency
